

CANDIDATE NAME: _____

CENTRE NUMBER: _____ CANDIDATE NUMBER: _____

CEFR ENGLISH EXAM

B2 First (FCE)

LISTENING

Topic: Environment & climate change

Time (approx): 40 minutes

INSTRUCTIONS TO CANDIDATES

Do not open this question paper until you are told to do so.

Write your name, centre number and candidate number on your answer sheet if they are not already there.

Read the instructions for each part of the paper carefully.

Answer all the questions.

Read the instructions on the answer sheet. Write on the answer sheet. Use a pencil.

You must complete the answer sheet within the time limit.

At the end of the test, hand in both this question paper and your answer sheet.

PART 1

Listen to the short interviews and choose the correct answer for each question.

1. What is Sarah's main area of work?

A A. Renewable energy

B B. Recycling programs

C C. Climate change research

D D. Sustainable agriculture

2. What motivated Sarah to start her project?

A A. She wanted to make money

B B. She was concerned about the environment

C C. She was inspired by a friend

D D. She was looking for a new job

3. Where does Sarah work?

A A. In a national park

B B. With local communities

C C. In a research laboratory

D D. In a government office

4. What is the main problem Sarah is trying to address?

A A. Lack of funding

B B. Limited resources

C C. Amount of waste in the city

D D. Climate change

5. How does Sarah feel about her work?

A A. She is very unhappy

B B. She is neutral

C C. She is passionate

D D. She is frustrated

6. What is the result of Sarah's work?

A A. A decrease in recycling

B B. An increase in waste

C C. Effective recycling programs

D D. No change

7. Who is Sarah talking to?

A A. A friend

B B. A colleague

C C. An interviewer

D D. A family member

8. What is the topic of the conversation?

A A. Climate change

B B. Recycling and conservation

C C. Sustainable energy

D D. Environmental policy

PART 2

Listen to the monologue and complete the sentences with the correct answer.

9. Climate change affects not only the environment but also (1) _____.
10. The main cause of sea-level rise is the (2) _____ of polar ice caps.
11. One of the consequences of climate change is an increase in (3) _____ disasters.
12. Climate change has significant impacts on global (4) _____ production.
13. To mitigate the effects of climate change, it is essential to reduce (5) _____ gas emissions.
14. Transitioning to (6) _____ energy sources is crucial to addressing climate change.
15. Climate change has severe consequences, including (7) _____ and floods.
16. The effects of climate change include (8) _____ shortages and economic losses.
17. Rising temperatures are causing the (9) _____ of polar ice caps.
18. Climate change is a complex issue that affects (10) _____ societies.

PART 3

Listen to the speakers and match the statements to the correct speaker.

19. Which speaker states that recycling and composting are the most effective ways to reduce waste?

A A

B B

C C

D D

E E

E E

ANSWER KEY (ANSWER SHEET)

PART 1 KEY

1.

A	B	C	D
☐	☒	☐	☐

RATIONALE:

Sarah mentions working with local communities to implement effective recycling programs, indicating that her main area of work is recycling. The other options are not supported by the conversation.

2.

A	B	C	D
☐	☒	☐	☐

RATIONALE:

Sarah states that she was concerned about the amount of waste in the city, which motivated her to start the project. The other options are not mentioned in the conversation.

3.

A	B	C	D
☐	☒	☐	☐

RATIONALE:

Sarah mentions working with local communities, indicating that her work is community-based. The other options are not supported by the conversation.

4.

A	B	C	D
☐	☐	☒	☐

RATIONALE:

Sarah states that she was concerned about the amount of waste in the city, indicating that this is the main problem she is trying to address. The other options are not mentioned in the conversation.

5.

A	B	C	D
☐	☐	☒	☐

RATIONALE:

Sarah's tone and language suggest that she is passionate about her work on recycling. The other options do not match the speaker's tone and language.

6.

A	B	C	D
☐	☐	☒	☐

RATIONALE:

Sarah mentions that she has been working to implement effective recycling programs, indicating that this is the result of her work. The other options are not supported by the conversation.

7.

A	B	C	D
☐	☐	☒	☐

RATIONALE:

The conversation is between Sarah and an interviewer, as indicated by the interviewer's questions and Sarah's responses. The other options are not supported by the conversation.

8.

A	B	C	D
☐	☒	☐	☐

RATIONALE:

The conversation is about Sarah's work on recycling and conservation, as indicated by the questions and responses. The other options are not the main topic of the conversation.

PART 2 KEY

9. *human societies*

RATIONALE:

The monologue states that climate change affects not only the environment but also human societies, indicating the correct answer. The other options are not supported by the conversation.

10. *melting*

RATIONALE:

The monologue states that rising temperatures are causing the melting of polar ice caps, which leads to sea-level rise. The other options are not supported by the conversation.

11. *natural*

RATIONALE:

The monologue mentions that climate change has severe consequences, including more frequent natural disasters such as hurricanes and floods. The other options are not supported by the conversation.

12. *food*

RATIONALE:

The monologue states that climate change has significant impacts on global food production, leading to food shortages and economic losses. The other options are not supported by the conversation.

13. *greenhouse*

RATIONALE:

The monologue states that it is essential to reduce greenhouse gas emissions to mitigate the effects of climate change. The other options are not supported by the conversation.

14. *renewable*

RATIONALE:

The monologue states that transitioning to renewable energy sources is essential to mitigate the effects of climate change. The other options are not supported by the conversation.

15. *hurricanes*

RATIONALE:

The monologue mentions that climate change has severe consequences, including more frequent natural disasters such as hurricanes and floods. The other options are not supported by the conversation.

16. *food*

RATIONALE:

The monologue states that climate change has significant impacts on global food production, leading to food shortages and economic losses. The other options are not supported by the conversation.

17. *melting*

RATIONALE:

The monologue states that rising temperatures are causing the melting of polar ice caps, which leads

18. *human*

RATIONALE:

The monologue states that climate change is a complex issue that affects not only the

PART 3 KEY

19.

A

B

C

D

E

RATIONALE:

Speaker 1 mentions that recycling and composting are the most effective ways to reduce waste. The other options do not match the speaker's statement.

20.

A

B

C

D

E

RATIONALE:

Speaker 2 states that climate change is a pressing issue that requires immediate attention and action. The other options do not match the speaker's statement.

21.

A

B

C

D

E

RATIONALE:

Speaker 3 mentions that sustainable practices such as using public transport and carpooling can significantly reduce our carbon footprint. The other options do not match the speaker's statement.

22.

A

B

C

D

E

RATIONALE:

Speaker 4 states that the main cause of environmental degradation is the lack of awareness and education about environmental issues. The other options do not match the speaker's statement.

23.

A

B

C

D

E

RATIONALE:

Speaker 5 mentions that renewable energy sources such as solar and wind power are the future of energy production. The other options do not match the speaker's statement.

PART 4 KEY**24.****A****B****C****D**☐☒☐☐**RATIONALE:**

Dr. Smith mentions that his research focuses on developing sustainable practices for businesses and communities, indicating that sustainable development is the main focus of his research. The other options are not supported by the conversation.

25.**A****B****C****D**☐☐☐☒**RATIONALE:**

Dr. Smith mentions that adopting a holistic approach that considers the interconnectedness of economic, social, and environmental systems is essential to balancing economic growth with environmental protection. The other options are part of this holistic approach.

26.**A****B****C****D**☐☐☐☒**RATIONALE:**

Dr. Smith states that governments and policymakers have a critical role to play in creating an enabling environment for sustainable development, including establishing policies and regulations and providing incentives for businesses to adopt sustainable technologies. The other options are not supported by the conversation.

27.**A****B****C****D**☐☒☐☐**RATIONALE:**

Dr. Smith's perspective on sustainability suggests that it is essential for long-term economic growth, as he emphasizes the importance of adopting sustainable practices for businesses and communities. The other options do not match the speaker's perspective.

28.**A****B****C****D**☐☐☐☐**RATIONALE:**

Dr. Smith does not explicitly state the main challenge in promoting sustainable development, but his emphasis on the importance of education and awareness-raising campaigns suggests that lack of awareness and education may be a significant challenge.

29.**A****B****C****D**☐☐☒☐**RATIONALE:**

Dr. Smith's perspective on sustainability suggests that adopting sustainable practices can lead to improved social and economic outcomes, as he emphasizes the importance of considering the interconnectedness of economic, social, and environmental systems. The other options do not match the speaker's perspective.

30.**A****B****C****D**☐☐☐☒**RATIONALE:**

Dr. Smith's perspective on sustainability suggests that businesses can play a critical role in promoting sustainable development by adopting sustainable

technologies and practices, investing in renewable energy, and reducing waste. The other options are part of this role.
